## **DETAILED ACTION**

1. This office action is in response to Decision on Appeal of dated 03/10/2210.

2. Status of Claims:

Claims 1-15 are canceled.

Claims 16-35 are pending.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 16-35 are rejected under 35 U.S.C. 101. Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must (1) be tied to a machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. *In re Bilski et al*, 88 USPQ 2d 1385 CAFC (2008); *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example **by identifying the apparatus that accomplishes the**

**method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.**

Here, applicant's method steps fail the first prong of the new Federal Circuit decision since they are not tied to a machine and can be performed without the use of a particular machine. Thus, claims 1-7 are non-statutory since they may be performed within the human mind (*human processor such as accountant who processes data using computer/calculator, in oppose to computer data processor where the machine does the significant work*).

The mere recitation of the machine with an absence of a machine in the body of the claim fails to make the claim statutory under 35 USC 101. Insignificant extra-solution activity will not transform an unpatentable principle into a patentable process (see John Love, Deputy Commissioner for Patent Examination Policy, memorandum Jan. 7, 2009).

In order to overcome this rejection, applicant should amend the claims to comply with USPTO guideline for rejection of USC 101. Add positively steps performed by the computer.

***Allowable Subject Matter***

4. Based on the decision on Appeal, claims 16-35 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101 set forth in this Office action.

Note: Based on the Examiner's discussion with Mr. Roland Long (Reg. 41,949) April 22, 2010, Mr. Long will provide claim language for independent claim for Examiner's Amendment to speed the prosecution. Since the statutory time set by the MPEP is running out, and Applicant has not provided an acceptable language to overcome the rejection of USC 101, therefore, this Non-Final is prepared.

***Conclusion***

5. This application is in condition for allowance except for the following formal matters:

Amending the claims to overcome the rejection of USC 101 based on USPTO "New Interim Patent Subject Matter Eligibility Examination Instructions".

Prosecution on the merits is closed.
